

CBNS-300 Nano-Spectrophotometer

CBNS-300 is an advanced nano-spectrophotometer with a full wavelength range of 200–800 nm. It features bacterium cell concentration detection (OD600) and operates independently without the need for a computer. With a minimal sample volume requirement of just 2μL, it provides rapid and accurate measurements. In addition to micro-volume detection, it is also equipped with a cuvette mode for measuring the concentration of bacteria and other culture media—ideal for estimating bacterial growth. The CBNS-300 is equipped with a 7-inch capacitive touchscreen and a customized Android system, making it a highly efficient and user-friendly solution for life science experiments.

- Direct detection of high concentration samples without dilution, maximum detection concentration up to 4500 ng/μL (dsDNA)
- Android system, 7-inch capacitive touch screen, optimized APP software
- Newly designed OD600 optical path detection system, new cuvette mode, for bacteria concentration detection
- High resolution CCD array detector, 5 s can complete the detection and display the results
- Long life pulse xenon lamp light source
- The test data is transferred to the computer via USB for easy sorting and analysis
- The built-in printer can print the report directly

CBNS-300 Unique Advantages

- Android system, 7-inch capacitive touch screen, optimized APP software
- Newly designed OD600 optical path detection system, new cuvette mode, convenient for the concentration detection of bacteria, microorganisms and other culture solutions
- High resolution CCD array detector, 5 s can complete the detection, display the results
- With its own high-definition touch screen and control program, it can be detected without a computer connection
- Long life pulse xenon light source, intelligently identify the user's usage. No operation within 5 minutes, the light source will be automatically turned off to prolong the service life
- The test data is transferred to your computer via USB flash memory for easy data sorting, analysis and storage
- Easy-to-use data to printer option, can print reports directly through the built-in printer
- Automatic detection and automatic blank function: automatically detect the sample concentration when the detection arm is lowered, which greatly shortens the detection time of large batches of samples.

Product Parameter

Specification	CBNS-300 Nano-Spectrophotometer
Wavelength range	200~800 nm
Minimum sample size	0.5~2.0 μ L
Path length	0.2 mm 1.0 mm
Light source	Xenon flash lamp
Detector type	2048-linear CCD array
Wavelength accuracy	1 nm
Spectral resolution	≤ 3 nm
Absorbance precision	0.003 Abs
Absorbance accuracy	1 % (7.332 Abs at 260 nm)
Absorbance range	0.04~90 A
Nucleic acid detection range	2~4500 ng/ μ L (dsDNA)
Measurement time	< 5 s
Dimension (WxDxH) mm	210x268x181
Weight	2.8 kg
Sample pedestal material	Aluminum alloy and quartz fiber
Operating voltage	DC 24 V 2 A
Operating power	25 W
Standby power	5 W
Software compatibility	Android system

Sales & Service Center: PT. GeneCraft Labs
